WHO WE ARE
We are the result of 25 years of experience in sectors for children, leisure, hotels and public institutions.

WHAT WE DO
We manage all kinds of projects involving leisure activities. We create a link between sport, everyday life and contact with the environment.

HOW WE DO IT
We listen to you and design a unique project suited to your surroundings and the culture of your space. We transform your leisure service into something different.

Nozzles
Drive nozzles, are made of acetal. Not being a metal is not electrically conductive and not corrode. They are resistant to chemicals, chlorinated environments, abrasion, as well as U.V. rays not as hot as the metal, and rapidly cooled. Drive nozzles made from brass.

Decorative pieces
The decorative pieces are made of polyester resin reinforced with fiberglass. During the manufacturing process Gel Coat is applied to provide maximum protection against contact with water. Are distinguished by their high resistance to chalking, yellowing of the surface, the long-term water immersion, the osmotic blistering, and for their ability to deaeration, elasticity and superior mechanical strength.

Screws
The screws used in the park is AISI-314 stainless steel.

Structure and game
The structure are made of stainless steel AISI-304. For a greater resistance to chemicals, it is applied a double treatment: zinc primer and epoxy finishing.
